## BocaVision STB121

### **BocaVision STB121 Dial-up ICA® Client.**

**Network access from anywhere, at a very attainable price.**

The BocaVision STB121 is the first ICA net client. With the embedded Web browser, dial-up modem and TV output, users can take the STB121 on the road and still access corporate WANs as well as the Internet. Plus, it delivers an exceptionally low total cost of ownership. Employing the BocaVision STB121, you're able to grant greater access to more users from more places at a lower cost than ever before.

**The quickest way to a better WAN.**

With a phone line, monitor (even a television), and an ISP connection, users can access and run Windows™

applications and the Internet from anywhere. The STB121 puts an end to complex local software configuration and eliminates concerns regarding control, contamination and desktop software conflicts. Best of all, it won't become obsolete when software is upgraded or powerful new applications are introduced. It's a dream come true to end users and Information Technology managers alike.

### **Backed by BocaVision.**

BocaVision is a leading innovator in server-based computing technology, and the STB121 is backed by a limited warranty.

**BocaVision  
STB121**
